Period of Project	:	October 2006 - June 2007
Topic	:	Design and implementation of Small Grants Program for multi-stakeholder cooperation in the Belarusian environmental movemen
Part of TreeVelop (%)	:	2,5
Total Value (€)	:	331.923

Project Description

This MATRA financed project increased the capacity for transboundary water resources management in the Vitebsk Oblast of Belarus. The focus was on increasing local involvement and understanding of water resources management from an environmental perspective, along with technical support to water quality authorities and civil society groups active in the field of environmental protection in the Oblast.

TreeVelop Part

Ms. Duijvelaar of TreeVelop has contributed to this project with the following activities:
• Development of the guidelines, application and reporting forms for the Small Grants Program for local NGOs and citizens groups;
• Evaluation of the progress and impact of the individual projects implemented under the Small Grant Program in the Vitebsk Oblast;
• Presentation of the results of the small grants, along with recommendations for further assistance to capacity building of the environmental civil society in Belarus.
