Project Description

The project team worked for increasing the capacity, improving the planning, the support of fruitful cooperation and large-scale public awareness in favor of sustainable development in the coastal zone of the Šibenik-Knin County of Croatia.
The concrete objectives of the project included:
• The civil society sector, regional, local and protection authorities in Šibenik-Knin County have an increased capacity, improved knowledge and clear understanding of sustainable development of coastal zones;
• Increased cooperation has strengthened the position of local authorities and environmental NGOs vis-a-vis the environmentally destructive (mass) tourism developments in the county;
• Widely available environmental education for local schools, along with public awareness raising in the county and a physical focal point for sustainable development of the coastal areas are successfully provided by the Sustainable Islands Education Center;
• A Sustainable Islands Network consisting of all relevant stakeholders (NGOs, regional and local (environmental) authorities, tourism organisations, farmers, the
